EIGHTEENTH

DETAILED

ANNUAL REPORT

OF THE

REGISTRAR-GENERAL

OF

MARRIAGES, BIRTHS, AND DEATHS

IN IRELAND.

1881.

Presented to both Houses of Parliament by Command of Her Majesty.

DUBLIN:
PRINTED BY ALEX. THOM & CO., 87, 88, & 89, ABBEY-STREET,
THE QUEEN'S PRINTING OFFICE.
FOR HER MAJESTY'S STATIONERY OFFICE.

1882.

[C.—3368]. *Price* 9½*d.*

CONTENTS.

	Page
REPORT:—	
Alterations in the law relating to Registration of Births and Deaths in Ireland,	1
Census Statistics of 1881 in relation to Birth and Death rates in Ireland,	4
Abandonment of Registration Divisions as Statistical Areas,	5
Defects in the Registration of Marriages of Roman Catholics,	5
Extension of the Table of Mortality by Diseases and Ages,	5
Modifications in the Classification of the Causes of Death,	5
Completeness of Reports on the Vital Statistics of Ireland,	13
Population, Marriages, Births, Deaths, and Emigration in 1881 and ten previous years,	13
MARRIAGES:	
Their Number and Proportion to the Population,	14
Causes of Low Marriage-rate in Ireland,	14
Number by each mode of celebration in the years 1871-81,	14
Number of Licences issued by Registrars,	14
Number of Licensing Presbyterian Ministers and of Licences issued by them,	15
Number of Buildings registered for Solemnization of Protestant Marriages,	15
Civil Condition of Persons Married,	16
Number of Roman Catholic and of Protestant Marriages registered in each quarter of the years 1878-81,	15
Ages of Persons Married,	16
Signatures to Marriage Registers and Certificates,	16
Marriage-rate in Provinces and Counties,	18
BIRTHS:	
Their Number and Proportion to the Population,	18
Causes of Low Birth-rate in Ireland,	18
Proportion of Illegitimate Births in Ireland and the several Registration Provinces,	19
Birth-rate in Provinces and Counties,	19
Number in each quarter of the years 1876-81,	20
DEATHS:	
Their Number and Proportion to the Population,	20
General Remarks on the Public Health,	20
Death-rate in the Provinces, and certain Counties,	21
Number in each quarter of 1881 and previous five years,	21
Causes of Death.—I. Febrile or Zymotic Diseases,	21
" II. Parasitic Diseases,	26
" III. Dietic Diseases,	26
" IV. Constitutional Diseases,	26
" V. Developmental Diseases,	27
" VI. Local Diseases,	27
" VII. Violence,	28
Inquests,	29
Ages at Death,	29

authorized to give information, with regard to deaths, has been considerably increased by all relatives being made informants in certain cases.

In cases of inquests the 26 Vic., c. 11, fixed no specific term for the transmission of the Certificate by the Coroner, to the Registrar. By sec. 16 of the new Act this duty is required to be performed within five days.

A valuable check on the Registration of Deaths is provided by section 17. It empowers a Coroner, upon holding an inquest, but not otherwise, to authorize the body to be buried before registry of the death; it also requires the Registrar, upon registering any death, or upon receiving written notice of a death accompanied by a Medical Certificate, to give, without fee, a Certificate that he has registered or received notice of the death; and the Coroner's Order or the Registrar's Certificate is to be delivered to the person who buries or performs any funeral or religious service for the burial of the body. The person who buries or performs any funeral or religious service for the burial of any dead body as to which no such Order or Certificate has been delivered to him, is required, under a penalty of £10, within seven days after the burial, to give notice thereof in writing to the Registrar or the Registrar-General.

Another new feature is the clause regulating the burial of still-born children, which provides that a person who has control over, or ordinarily buries bodies in, any burial ground, shall not permit the burial of any child as if it were still-born, or the burial of any still-born child without either; (*a*) A written Certificate signed by a registered Medical Practitioner; or (*b*) A declaration by some person who would, if the child had been born alive, have been required to give information concerning the birth, or by the person to whom permission for burial is given, to the effect that no registered Medical Practitioner was present at the birth, or that his Certificate cannot be obtained, and that the child was not born alive; or (*c*) If there has been an inquest, an order of the Coroner.

Section 19 requires that where there is more than one body brought for burial in the same coffin, the person having charge of the funeral shall deliver a notice in writing to the person who buries or performs any funeral or religious service for the burial; and such last-mentioned person is required to forward such notice to the Registrar of the district in which the deceased died, or to the Registrar-General, as the Local Government Board for Ireland may from time to time direct.

An important change has also been made with respect to medical certificates of the cause of death. Under the old statute, the informant when attending to register, furnished a statement of the cause of death and duration of illness, at the same time stating, where a medical practitioner was in attendance, the name and address of such practitioner. It was then the Registrar's duty to apply to him for a medical certificate, if not previously received, and to complete the column in the register in accordance with such certificate. Under the new procedure the medical attendant is required to give a certificate to the informant who is required to deliver it to the Registrar, and the entry of the cause of death is thus made directly from the medical certificate in the first instance.

The method of correcting errors has been materially altered. Under the old system errors discovered in a Register of Births or Deaths after the entries had been completed could only be corrected before the magistrates at petty sessions. This involved, even in the most trivial cases of clerical errors, the attendance in court of the Registrar and the parties concerned, frequently at a distance of many miles.

This requirement, while valuable in disputed cases, or cases in which fraudulent alteration was sought to be made, was cumbrous in the extreme when applied generally. It often happened that the Registrar had to attend two or three times for the correction of the same case owing to the non-attendance of magistrates, the non-appearance of the parties, or other circumstances.

Under the new enactment, attendance at petty sessions is dispensed with and errors are divided into Clerical Errors and Errors of Fact or Substance.

As regards clerical errors, the Act provides that they may be corrected by any person authorized by the Registrar-General, subject to the prescribed rules. Under these rules all accidental errors and omissions made through want of care in entering the particulars or signing the entries, or through misunderstanding on the part of the informant or the Registrar, are deemed clerical errors, and they are divided into two classes, the first consisting of the more trivial mistakes, to be corrected by the Registrar in the presence of the Superintendent-Registrar, the Inspector of Registration, or an informant, or on the written authority of the Registrar-General; the second class—consisting of the more serious errors—in the presence of an informant only.

All errors, other than the above, are deemed errors of fact or substance and are corrected only on production of a statutory declaration made before a justice of the peace by an informant, setting forth the nature of the error and the true facts of the case. A fee of 2*s.* 6*d.* is payable to the person having the custody of the register for the correction of an error of this kind.

Amongst minor changes may be mentioned :—

1. The provision made for registry of birth in cases where the informant removes, before the birth is registered, out of the district in which it took place.

2. The power to appoint Interim Registrars, and Interim Superintendent Registrars. Under the old system, where neither Registrar nor Deputy could act, the registration was suspended in some cases for months.

3. The new requirement with respect to the registry of illegitimate children. Prior to 1881, the mother of an illegitimate child could, acting as informant, have the name of any person inserted in the register as father of such child. Under the new Statute the Registrar is prohibited from entering the name of any person as father of an illegitimate child, unless at the joint request of the mother and of the person acknowledging himself to be the father of such child, both of whose signatures are required to the entry.

4. The extension of the time within which prosecutions could be undertaken to three years, instead of six months, the limit placed under the old system, by the Petty Sessions (Ireland), Act, 1851. In a large number of cases this limit prevented proceedings being taken, as the defaulters were not discovered until after the expiration of the prescribed period.

Several additional omissions and irregularities have been constituted offences punishable at Petty Sessions, such as the omission or refusal to furnish certificates required by the Act. The tendering of a false certificate, or declaration, or giving false information to the Registrar, previously punishable only on indictment, can now be dealt with also by summary conviction.

5. Increased and additional fees are payable to Registrars and Superintendent Registrars in certain cases.

6. The extension, from six to twelve months, of the time for adding a baptismal or other name, when given subsequently to registration, and also a new provision for the alteration of a name.

I have the honour to report to your Excellency, that I believe the various changes introduced by the new Statute will materially facilitate the working of the Registration System in this country.

Although this Act came into force opportunely at the commencement of a new decade, yet the necessity of making the necessary arrangements for its administration was attended with unusual difficulties, inasmuch as these had to be carried out in the midst of the preliminary arrangements for the then approaching Census. I am, however, happy to state that the efficiency of my staff enabled me to carry out both these important works contemporaneously, within the necessary limit of time.

The effects of using the population statistics, obtained through the Census of 1881 in making the calculations of birth and death rates in Ireland, are best illustrated by the following extract from the Quarterly Return for the second Quarter of 1881, when the Census figures first became available for the purpose. In the extract the revised figures are employed instead of the unrevised, as is the return from which the extract is derived:—

"The results hitherto published in the weekly, quarterly, and annual reports, issued by this department, have been mainly founded upon calculations based on the enumerated population according to the Census of 1861 and of 1871. The Act for the Registration of Births and Deaths in Ireland only came into force in the year 1864. During the first few years after the enforcement of the Act there were many defects in registration. The defects of Death registration were demonstrated for the first time when the result of the Census for 1871 became known. By these returns it was shown that the number of the deaths registered in the City of Dublin fell short of the number of the bodies of Dublin citizens buried in the principal Dublin cemeteries by about 9 per cent. Exact information relative to provincial cemeteries was not obtainable, but it was quite clear that similar discrepancies existed between the number of burials and the number of deaths registered in other parts of Ireland. Under these circumstances, the population of Ireland was, since 1872, estimated, 'by assuming the average annual excess of births over deaths to equal 1 per cent. of the population, and deducting the number of emigrants according to the returns obtained by the Registrar-General.'

Year. (1.)	Population* at beginning of Year. (2.)	Births. (3.)	Deaths (4.)	Emigration. (5.)	Total of Deaths and Emigration. (6.)	Excess of Deaths and Emigration over Births. (7.)	Population at end of Year.* (8.)

1881, part of,	5,220,066	31,497	28,714	10,108	38,822	7,325	5,212,741†

* The population entered for 1871 in column 2 is that shown by the Census for that year; the figures for the end of the years 1871-80, are those arrived at by the means stated on page 5.

† At close of first quarter, estimated as above.

‡ In each of the years 1876 and 1877 the number of Births registered exceeded the number of Deaths registered and Emigrants.

"This is the first time since registration of Births and Deaths commenced in Ireland, when the means exist of making an accurate comparison between the results obtained by registration and enumeration, and thus finding correct data for estimating the population from year to year.

"The population of Ireland estimated according to the plan pursued since 1871, was to the middle of the year, 1881, 5,298,851, whereas the enumerated population, according to the recent Census was 5,174,836, showing a discrepancy of 124,015, or 2·4 per cent.

The tabular statement on page 4 shows the population estimated by adding the births in 1871 to the enumerated population of 1871, and subtracting the deaths and emigration.

"The result of this statement is an estimated population for 31st March, 1881 of 5,212,741, being 37,905 more than the enumerated population, showing a discrepancy of 0·7 per cent. It would thus appear that this is a more correct method of estimating the population than that pursued from 1871 up to the present time, and this plan will be pursued in future."

Hitherto the tables in the annual and quarterly reports have been arranged by "registration divisions," of which there were eight in Ireland. These "divisions," however, did not correspond with any recognised geographical areas of the country, and experience showed they had but little significance to the public. It therefore seemed a useless complication to introduce these artificial geographical divisions, and accordingly they have been abandoned. The tables attached to this report have been compiled according to "Registration," Provinces, Counties, Superintendent-Registrars' districts, and Registrars' districts. The Superintendents' districts are coincident with the Poor-Law Unions, and the Registrars' districts with dispensary districts. The Registration provinces and counties correspond closely to, though they are not coincident with, the ordinary geographical boundaries of the provincial and county areas.

In dealing with the question of marriages, I regret to state that the arrangements for the recording of marriages among the Roman Catholic portion of the community are still of a cumbrous and unsatisfactory character. While the Roman Catholic clergy give valuable aid in carrying out, and the Registrars do their best to administer, the Act in their localities, yet so much depends upon the manner in which the "husband" discharges his duty as conveyer of the certificate of marriage to the Registrar, and, in fact, his action as informant of his own marriage, that in spite of the desire of the clergy and the care of the Registrar, many marriages are imperfectly registered, and, I fear, a considerable number even escape registration altogether through the ignorance or carelessness of the parties married. It is much to be regretted that public records of Roman Catholic marriages in Ireland are liable to these defects, while the marriages of the members of all other denominations are carefully and accurately recorded. In order to remedy these defects a considerable revision of the existing statute (26 & 27 Vic., cap. 90) would be necessary.

An addition has been made to the tables of mortality where the causes of death are tabulated by ages, sexes, and fatal diseases (pages 112–126), and where the deaths are arranged by provinces and diseases (pages 127–131). Formerly the corresponding tables were only constructed for each sex separately, which rendered a calculation necessary, if it was desired to ascertain the total mortality in both sexes from any particular disease. The tables have been now so extended as to give this information at a glance without any calculation or re-arrangement of the figures.

Some modifications have been introduced into the method of classification of the causes of death. These have been necessitated by the advance

of medical science and consequent alterations in nomenclature and grouping of various fatal maladies. These alterations have been introduced after consultation with the Registrar-General for England and Dr. William Ogle, the Medical Superintendent of Statistics, at the General Register Office in London. Thus, by an arrangement with the heads of that department, the classification used by the English and Irish departments will be identical, and the mortality statistics, therefore, strictly comparable. Some other slight changes have also been made, all of which have been agreed upon between the two departments. This amended system of classification has also already been adopted in the weekly and quarterly returns issued by this Department. The changes in the classification of diseases are indicated in the following schedules :—

The usual quarterly returns, prepared from data periodically furnished by the Registrars, were published during the year, and furnish information upon some of the more important points dealt with in this report. These returns, however, give details only with regard to some special points

and are not absolutely accurate. In addition to these, the returns for the sixteen principal town districts in Ireland, containing a population of about 850,000, commenced in 1880, have been regularly issued from week to week, and quarterly, and annual summaries of these weekly reports have also been published. Thus the reports upon the vital statistics of Ireland are now as complete and frequent as those issued in any country in the world. These weekly returns are of especial value to the urban sanitary authorities of the larger town districts, to whom they form an index of the health of the areas under their charge.

In the quarterly returns for the year 1881 a new table was introduced giving details of the most important items for the urban sanitary districts in Ireland containing a total population of upwards of one million. These quarterly returns are of great value, as they provide correct data by which both urban and rural sanitary authorities can estimate the state of the public health in their districts.

GENERAL SUMMARY.

The Marriages registered during the year 1881 number 21,826; the Births 125,847; and the Deaths 90,035. Both absolutely and in proportion to the estimated population, the marriages, births, and deaths are under the annual average for the preceding ten years.

TABLE I.—Showing for each of the years 1871–81, the estimated **Population**; the number of **Marriages, Births,** and **Deaths** registered, and the number of **Emigrants** enumerated, with the rates per 1,000 of the estimated Population represented thereby, and the averages for the ten years 1871–80.

1880, . . .	5,202,648	20,363	128,086	102,906	95,517	3·92	24·7	19·8	17·6
Yearly Average, 1871–80.	5,299,106	25,016	140,228	96,675	62,393	4·69	26·3	18·1	11·7
1881, . .	5,144,983	21,826	125,847	90,035	78,417	4·24	24·5	17·5	15·2

The recorded natural increase of population, or excess of births over deaths was 35,812, the loss by emigration, amounting to 78,417; there would thus appear to have been a decrease of 42,605 in the population during the year, but against a portion of this decrease there is a set-off in immigration of which no official record has been obtained. The estimated population in the middle of the year was 5,144,983.

* See page 34.

MARRIAGES.

The number of marriages registered during the year was 21,826, being 1 in every 236, or 4·24 per 1,000 of the estimated population.

This rate, although slightly in excess of that for the preceding year, is below the low rate yielded by the average annual number of marriages registered during the ten years 1871-80, which was much under the marriage-rates in other countries, the statistics of which are available. The low marriage-rate in Ireland, as compared with other countries, must be largely attributed to the extensive emigration which takes place among persons of marriageable ages. No doubt there is some defect in the registration of Roman Catholic marriages, owing to causes referred to in the preliminary part of this report, but a comparison of the birth-rate from year to year confirms the opinion that the marriage-rate is low. This subject has been more fully dealt with in the Reports for the year 1879 and previous years.

Of the 21,826 marriages registered during the year 1881, 14,981 were between Roman Catholics, 3,690 were celebrated according to the rites and ceremonies of the late Established Church; 2,318 were in Presbyterian Meeting-houses; 341 in "Registered Buildings" belonging to various religious denominations; only 490 by civil contract in the Registrars' offices; and 6 were according to the usages of the Society of Friends.

TABLE II.—**Marriages** registered in Ireland in 1881 and each of the previous ten years, according to the **modes of celebration**; with the **rate** per 1,000 of the population represented:—

1881,	3,690	2,318	341	490	6	.	6,845	14,981	21,826	5·64	3·78	4·24

Of the 3,690 marriages according to the rites of the late Established Church, 68 were by special licence, 3,119 by licence, 401 after the publication of banns, 12 on Registrar's certificate, and in 90 instances there was no information afforded as to which of the foregoing methods was adopted.

During the year 1881 there were issued by the Registrars 659 Licences for Marriage in Registered Buildings and in the Registrars' offices.

The number of Marriage Licences issued by the licensing Ministers of the several Presbyterian bodies is given in the following summary:—

Presbytery or Synod.	Number of Licensing Ministers on 31st December, 1881.	Number of Registered Meeting-houses on 31st December, 1881.	Number of Licences issued.
1. General Assembly of the Presbyterian Church in Ireland,	129	559	2,173
2. Remonstrant Synod of Ulster, ...	8	19	47
3. Presbytery of Antrim, ...	4	8	6
4. United Presbytery or Synod of Munster, ...	3	2	—
5. Northern Presbytery of Antrim, ...	2	5	11
Total, ...	146	593	2,237

There being no civil restrictions as to the time or place for celebrating marriages between Roman Catholics in Ireland, a registration of the churches and chapels of the Roman Catholic Church is not necessary for the purposes of this office; but with reference to other religious bodies, a record is kept of the places of Divine worship in which marriages may lawfully be solemnized without special licence, and from this it appears that, on the 31st December, 1881, there were 1,505 churches and chapels of the late Established Church, 593 registered Presbyterian Meeting-houses, and 313 "Registered Buildings" belonging to various religious denominations. Compared with the previous year, these numbers show a decrease of 2 as regards the late Established Church, a decrease of 1 Presbyterian Meeting-house, and an increase of 3 "Registered Buildings."

The following statement shows the several religious bodies having "Registered Buildings" in 1881:—

Denominations.	No. of Places of Worship.	Denominations.	No. of Places of Worship.
Methodists, ...	186	United Original Seceders, .	1
Reformed Presbyterians, . .	37	"Protestant Dissenters," .	1
Independents, . . .	24	"Christians," . . .	1
Baptists, ...	18	Non-Subscribing Christians, .	1
Seceders, ...	11	Non-Subscribing Unitarians, .	1
United Presbyterians, . .	11	"The Catholic Apostolic Church,"	1
Methodists, New Connexion, .	6	Christian Brethren, . .	1
Moravians, or United Brethren,	6	Independent Protestants, .	1
Evangelical Union, . . .	2	Jews, ...	1
Unitarians, ...	2		
Covenanters, ...	1	Total, . . .	313

As more than a moiety of the annual number of Roman Catholic marriages in the provinces of Munster and Connaught are celebrated between Christmas and Shrovetide, the marriages registered in Ireland during the first quarter of the year always largely outnumber those in any of the other quarters. In 1881 the numbers recorded were—in the first quarter, 7,643; in the second, 4,590; in the third, 4,734; and in the last, 4,859.

The marriages of bachelors and spinsters constitute 85·4 per cent. of the total; those of widowers and spinsters 8·9 per cent.; of bachelors and widows 3·0 per cent.; and of widowers and widows 2·7 per cent. Thus, 12 in every 100 of the men married were widowers, and 5·7 per cent. of the

women were widows; and in 15 instances in every 100 marriages one or both of the contracting parties had been in the married state before.

TABLE III.—The Number of **Roman Catholic** and of **Other Marriages** registered in each Quarter during the four years, 1878–81 :—.

QUARTER ENDING THE LAST DAY OF	Years and Number of **Marriages** Registered.							
	1878.		1879.		1880.		1881.	
	Roman Catholic.	Others.	Roman Catholic.	Others.	Roman Catholic.	Others.	Roman Catholic.	Others.
March,	8,135	1,679	7,072	1,538	4,515	1,717	6,123	1,520
June,	2,897	1,767	3,135	1,628	3,239	1,480	3,021	1,569
September,	3,325	1,923	3,163	1,677	2,876	1,717	2,936	1,798
December,	3,541	2,017	3,158	1,883	2,864	1,955	2,901	1,958
Total,	17,898	7,386	16,528	6,726	13,494	6,869	14,981	6,845
General Total,	25,284		23,254		20,363		21,826	

A complete registry of the exact ages of the persons married would be valuable from many points of view; hence it is matter for regret that in the great majority of instances the ages are not recorded. The requirements of the law are technically complied with by the entry in the age column of "minor" or "of full age," as the case may be, and there seems to be a general and increasing inclination to take advantage of this circumstance, as in 1881 the ages of both parties were specified in only 5,723 instances, being little more than one-fourth of the total number of marriages. In the year 1865, when 30,802 marriages were registered, the ages of both parties were given in 13,910 instances.

Of 21,826 men married during the year, 554, or 2·54 per cent. were minors; and of the women married, 2,438, or 11·17 per cent., were under age. These proportions differ but slightly from the averages for the preceding ten years.

The highest proportion of husbands (3·22 per cent.) married under age in 1881 was in the province of Ulster, and the highest per-centage of wives (13·03) in Connaught.

It may be added that the per-centage of persons married in Ireland who were under age is very far below the corresponding rates in England and Scotland.

The signatures of the contracting parties in the marriage registers or certificates afford a rough test of the progress of elementary education. In the year 1881, 16,129, or 73·9 per cent. of the husbands, and 15,134, or 69·3 per cent. of the wives, wrote their names, and the remainder signed by marks.

These figures, though still leaving much to be desired, contrast hopefully with the corresponding results eleven years since, the per-centage of persons married in 1871 who wrote their names being—men 62·3, and women 54·8.

As usual, the most favourable results appear in Leinster, and the least satisfactory in Connaught, the number of those married who wrote their names varying from 79 in every 100 men and 77 in every 100 women in the former Province, to 63 per cent. of the men and 61 per cent. of the women in the latter.

The number of marriages registered in each of the eleven years 1871–81; the proportion per cent. of persons married who wrote their names in the registers, of minors, of widowers, and of widows, are given, in the following table, for Ireland, and for each of the four registration provinces.

TABLE IV.—The Number of **Marriages** in Ireland and in each of the Four Registration Provinces during the years 1871-81, with the proportion per cent. of Persons who **signed their Names**, of Persons **not of Full Age**, and of **Re-marriages.**

Registration Provinces.		Number of Marriages.	Signed their Names in Writing.		Persons not of Full Age.		Re-marriages.	
							Widowers.	Widows.
			Of 100 Men Married.	Of 100 Women Married.	Of 100 Men Married.	Of 100 Women Married.	Of 100 Men Married.	Of 100 Women Married.

	1878	3,336	62·0	59·6	2·55	16·43	9·68	4·41
	1879	3,199	61·4	60·4	2·94	17·57	8·78	4·13
	1880	2,079	64·8	60·6	3·13	16·93	10·34	5·58
	1881	2,671	62·6	60·8	2·51	13·03	10·78	4·98

In 3,906 instances, both of the parties married signed the register by "mark," and in 4,566 cases the register was thus signed by either the husband or the wife, so that in 8,472 instances, or 38·8 per cent. of the total number of marriages, one or both of the parties signed by mark; and in 13,354 instances, or 61·2 per cent. *both* parties wrote their names.

In proportion to the estimated population at all ages the registered marriages were most numerous in the province of Leinster, in which, however, the rate was only 5·0 per 1,000 persons; Ulster comes next, with 4·5 per 1,000; Munster third, with 3·7 per 1,000; and Connaught last the rate being 3·3 per 1,000.

The highest rate in any county was 7·1 per 1,000, which was the marriage rate for Dublin; and the lowest 2·7 per 1,000 for Cavan. Between these, the most favourable were 6·1 for Antrim, 5·1 in Armagh, 4·6 in Down, and 4·5 in Londonderry; and the least so 2·8 in Clare; 2·9 in Galway; and 3·0 in Leitrim.

BIRTHS.

The number of births registered during the year 1881 was 125,847—64,793 boys, and 61,054 girls, or 106·1 of the former to every 100 of the latter—the rate afforded in proportion to the total population being 1 in 40·9, or 24·5 per 1,000, which is considerably under the low average rate (26·3 per 1,000) for the ten years, 1871–80, and less than the rate in any of those years.

In the report for the year 1875, the causes of the comparatively low birth-rate in Ireland were considered, and the observations then made are almost equally applicable to the year now under review:—

"It has been seen that the marriages *registered* in Ireland, when compared with the total population, fall far short of the proportion in England. The births, too, present a contrast—not, indeed, so striking, but still sufficiently so to call for explanation; the average rate in England being 35·4 per 1,000 persons, against 26·9 per 1,000 in Ireland.

"A large portion of the disparity between the marriage rates has been accounted for, and shown to be owing to the special circumstances of Ireland, and it is obvious, that, speaking in general terms, there must be a corresponding difference between the birth-rates.

"Pursuing the inquiry with special reference to births, and omitting, for the present, those of children born out of wedlock, it is found that the average rate of legitimate births in England for the ten years 1865–74 was 33·4 per 1,000 of the population, and that the corresponding rate in Ireland was only 26·1 per 1,000.

"The conclusion at first naturally suggested by these figures is that the registration of births in Ireland must be very defective; but, on examination, this proves to be, in great part, erroneous.

"In 1871, according to the Census, the married women in England between the ages of 15 and 55, which may be taken as the limits of the child-bearing period, formed 14·7 per cent. of the total population at all ages, and in Ireland the corresponding proportion was only 11·8 per cent., or, in other words, there were five married women, possible mothers, in England to 4 in an equal number of the population in Ireland. Taking the ages 15 to 45 years, the difference is even greater.

"Assuming the actual births to be in the same ratio to the number of

married women in each of the two countries, it is evident that the births in any given number of the total population in Ireland must be less than the corresponding rate in England to the extent that the proportion of married women in the former country falls short of that for the latter.

"This being so, the respective rates for legitimate births, given above, namely, 26·1 per 1,000 persons in Ireland, and 33·4 per 1,000 in England, are reconcileable, as they bear the same ratio to each other as the relative proportion of married women in the population; and, looking at the numbers from another point, it is found that the births in England are annually equal to 224 to every 1,000 married women of the child-bearing ages, and that the registered births in Ireland, equal 223 per 1,000.

"There is a popular opinion that the mothers of Ireland are more fruitful than those of England; but this, if true in the abstract, must, under present conditions, be to a certain extent neutralized by the comparatively late period of life at which many marriages in Ireland now take place."

Of the 125,847 children whose births were registered in Ireland during the year 1881, 122,649, or 97·5 per cent., were legitimate, and 3,198, or 2·5 per cent., were illegitimate. The average per-centage of illegitimate births in the preceding 10 years was 2·4.

It is unnecessary to say that these results compare very favourably with the returns for most other countries.

Of the children born in wedlock during the year, 63,138 were males, and 59,511 females, being 106·1 of the former to every 100 of the latter; and of the illegitimate children 1,655 were males, and 1,543 females, or 107·3 boys to 100 girls.

TABLE V.—The Per-centage of **Legitimate** and of **Illegitimate** Births registered in Ireland during the years 1877-81, by Registration Provinces.

Registration Provinces.	Proportion per cent. of Legitimate Births.					Proportion per cent. of Illegitimate Births.				
	1877.	1878.	1879.	1880.	1881.	1877.	1878.	1879.	1880.	1881.
IRELAND, . . .	97·6	97·7	97·5	97·5	97·5	2·4	2·3	2·5	2·5	2·5
LEINSTER, . . .	97·8	98·1	97·9	97·8	97·8	2·2	1·9	2·1	2·2	2·2
MUNSTER, . . .	98·4	98·4	98·1	98·2	98·2	1·6	1·6	1·9	1·8	1·8
ULSTER, . . .	96·1	96·1	96·0	96·0	95·9	3·9	3·9	4·0	4·0	4·1
CONNAUGHT, . . .	99·3	99·3	99·3	99·0	99·2	0·7	0·7	0·7	1·0	0·8

Comparing the provinces, we find that the per-centage of children born in Ulster, who were illegitimate, was 4·1; in Leinster, 2·2; in Munster, 1·8; and in Connaught, 0·8.

The extremes of the county rates are found in Down and Mayo. In the former of 5,671 births registered, 328, or 5·8 per cent. were illegitimate, and in the latter, out of 6,013 births recorded, only 29, or 0·5 per cent., were so classed.

The respective total birth-rates for the provinces in 1881 were—Ulster, 24·8 per 1,000 of the population; Leinster, 24·5 per 1,000; Munster, 24·1; and Connaught, 23·5.

The four counties having the highest rates were—Antrim, 30·0 per 1,000 inhabitants; Dublin, 28·6; Kerry, 26·1; and Mayo, 24·6. Those with the lowest rates were—Fermanagh, 19·8; Wicklow, 21·9; Meath, 20·5; and Tyrone, 20·9 per 1,000 persons.

Of the total births, 52·2 per cent. were registered in the first six months of the year (181 days), and 47·8 per cent. in the second half of the year (184 days).

The number registered in the first quarter was 31,497; in the second, 34,221; in the third, 31,444; and in the fourth, 28,685.

TABLE VI.—Showing, by **Quarterly Periods,** the number of **Births** registered in Ireland in each of the five years 1876–80, and the average number for that period; also the number registered during each quarter of the year 1881:—

DEATHS.

The deaths registered during the year amount to 90,035, being equal to 1 in 57·1 or 17·5 per 1,000 of the estimated population. The deaths of males number 45,064, and those of females 44,971, the former being equal to 17·9 in every 1,000 males living, and the latter representing 17·1 per 1,000 females.

The death-rate (17·5) is somewhat under the average rate (18·1) for the preceding ten years, and is much below the rates for 1879 and 1880—that for 1879 being 19·6 per 1,000, and that for 1880, 19·8.

The recorded mortality from zymotic diseases is much below that for the year 1880, and the average for the ten years 1871–80.

The deaths from the eight principal zymotic diseases* registered during 1881 form 8·3 per cent. of the deaths from all causes, and are equal to 145 in every 100,000 persons living; the average annual mortality from the same diseases in the preceding 10 years represents 11·9 per cent. of the average number of deaths from all causes, and is equal to 216 deaths in every 100,000 of the estimated mean population.

As heretofore, very many of the Registrars furnished at the close of each quarter valuable notes on the sanitary condition of their respective districts. These notes were embodied in the Quarterly Returns issued from this department, and, emanating as they did, from gentlemen

* Small-pox, Measles, Scarlet Fever, Diphtheria, Whooping-cough, Fever, Diarrhœa (and Dysentery), and Cholera.

qualified to speak decisively on the subject, it is to be hoped that they received the serious attention of the various Local Authorities intrusted with the administration of the Public Health Acts. In this place it will be sufficient to say that the Registrars' observations, while disclosing many lamentable defects in sanitation, point to a gradually extending interest in sanitary questions which must, ere long, be productive of lasting good.

With respect to the death-rates for the four provinces, that for Connaught is only 13·3; for Munster is 17·2; for Ulster, 17·5, and for Leinster, 20·1.

Of the thirty-two counties, the four having the lowest registered mortality are—Roscommon, only 12·0 per 1,000; Sligo, 13·1; Leitrim and Mayo, 13·6.

Those in which the rate was highest are—Dublin, 25·6; Waterford, 21·5; Louth and Antrim, 20·2.

The deaths registered in the first half of the year always largely outnumber those in the second. In 1881 58·1 per cent. of the total deaths were registered in the six months, January to June inclusive, and only 41·9 per cent. in the remaining six months of the year.

The annual rates represented by the deaths registered in each quarter are as follows:—First quarter, 22·3 per 1,000 of the population; second, 18·3; third, 14·0; and fourth, 15·4.

TABLE VII.—Showing, by **Quarterly Periods**, the number of **Deaths** registered in Ireland in each of the five years, 1876–80, and the average number for that period; also the number registered during each quarter of the year 1881:—

CAUSES OF DEATH.

I.—FEBRILE OR ZYMOTIC DISEASES.

The deaths from Febrile or Zymotic diseases registered during the year 1881 amounted to 8,459, or 164·2 in every 100,000 of the estimated population.

Of the 8,459 deaths from zymotic diseases, 4,316 or 51·0 per cent. were amongst children under 10 years of age.

TABLE VIII.—Showing, by PROVINCES, the Number of Deaths from the principal Febrile or Zymotic Diseases *registered* in Ireland during the Ten Years 1871–80; the Average Annual Number for that period; with the Number *registered* in 1881, and the Rate represented thereby.

Small-pox.—There were only 72 deaths from small-pox registered, being 317 under the number in 1880, and 600 less than in 1879. Of the deaths from this disease in 1881, 19 were in the province of Leinster, 18 in Munster, 33 in Ulster (including 25 in the Union of Belfast), and 2 in Connaught. In the year 1876 only 24 deaths from this cause were recorded, and in 1877 only 71, but the average annual number for the ten years 1871–80 was 755.

Measles.—Deaths from measles, which fell from 2,212 in 1878 to 860 in the following year, and rose to 1,025 in 1880, declined to 402 in 1881; this number is equal to an annual mortality of 7·8 per 100,000 persons. The disease was most fatal in Leinster and Munster.

In the province of Leinster the deaths numbered 188 (of which 160 were in the city and county of Dublin); in Munster 148; in Ulster 46; and in Connaught 20.

Scarlet Fever.—The deaths from this disease which numbered 2,443, or 47·08 per 100,000 persons in 1880, fell to 1,344, or 26·0 per 100,000 in 1881; the average for the ten years 1871–80 was 2,308.

The deaths from scarlet fever in 1881 were distributed through the four provinces as follows:—Leinster, 411; Munster, 607; Ulster, 278; and Connaught, 48.

Diphtheria.—This disease proved fatal in 323 instances, being 9 over the number of deaths in the previous year, but 17 under the annual average for the 10 years 1871–80. In proportion to population the highest mortality (8·8 per 100,000 persons), was in the province of Ulster.

Whooping-cough.—The deaths (1,358) from whooping-cough are 485 under the average for the ten years 1871–80, and 1,013 under the number registered in the year 1880; they afford an annual rate of 26·2 per 100,000 of the estimated population. In proportion to population the mortality was highest in Munster and lowest in Connaught, the rates being 36·1 and 12·0 per 100,000 persons respectively.

Fever.—The number of deaths from the several forms of continued fever amounted to 2,446 (1,318 males and 1,128 females), equal to a mortality of 47·3 per 100,000 of the population; the average annual number for the previous ten years was 3,009; the number in 1880 was 3,100. The respective rates for the provinces, in 1881, were Leinster 54·6 per 100,000 inhabitants; Munster 53·4; Ulster 38·5; and Connaught 44·5.

There were only 4 Superintendent Registrars' Districts in which the deaths from fever equalled 1 per 1,000 of the population, viz.:—Dublin North, in Leinster; Cork, in Munster; Inishowen, in Ulster; and Loughrea, in Connaught.

Of the registered deaths from fever, 859 were ascribed to typhus, 813 to typhoid or enteric, and 774 to simple continued fever, or vaguely as to "fever." The age periods 45 and under 55 years, and 55 to 65, were those in which fever proved most fatal in proportion to the living at the same ages; the former yielding a rate of 59·59 per 100,000, and the latter 59·32. The lowest rate was 28·65 for the period "under 5 years old."

TABLE IX.—Showing for the year 1881 the Deaths from the several forms of **Fever** at each Age-Period, with the proportion to the number of the living at each Age represented thereby.

Erysipelas.—The deaths from erysipelas numbered 256, being 38 under the annual average for the preceding decade, but 8 over the number in the year 1880. The highest mortality in 1881 in proportion to the population was in Ulster, and the lowest in Leinster.

Puerperal Fever.—The number of deaths from this disease registered in 1881 was 354, being equal to the average annual number for the ten years 1871–80, and 7 more than in the year 1880.

Influenza.—Fifty-four deaths were ascribed to this disease; the number in 1880 was 69, and the annual average for the ten years 1871-80 was 97.

Diarrhœa and Dysentery.—In 1880 the deaths from diarrhœa and dysentery were much above the average, these diseases proving fatal in 2,619 instances, equal to a mortality of 50·4 per 100,000 of the estimated population; in 1881 the deaths fell to 1,526 (equal to 29·5 per 100,000 of the population), being 538 under the average annual number for the ten years 1871-80.

The rates for the provinces in 1881 were as follow :—Leinster, 27·3 per 100,000 persons; Munster, 40·2; Ulster, 28·5; and Connaught only 17·6.

Simple Cholera.—Thirty-nine deaths were ascribed to this disease.

Five males and seven females died from *Hydrophobia.*

II.—Parasitic Diseases.

There were 108 deaths caused by diseases of this class.

III.—Dietic Diseases.

The deaths in this class number 175; they comprise 150 from intemperance, 114 of which (99 males and 15 females) come under the head of chronic alcoholism and 36 (all males) were caused by delirium tremens.

IV.—Constitutional Diseases.

From diseases termed "constitutional" there resulted 16,022 deaths (7,626 males, and 8,396 females), affording a rate of 1 in 5·6 of all the deaths, and equal to 311 in every 100,000 of the population.

Phthisis or Pulmonary Consumption proved fatal in 10,027 instances —4,651 males, and 5,376 females—being equal to 193·8 in every 100,000 persons; the average annual number for the previous ten years was 10,353.

As heretofore, Leinster and Ulster yield the highest rates, and Connaught the lowest. The rates for the four provinces are as follow :— Leinster, 231 per 100,000 of the population; Ulster, 230; Munster, 156; and Connaught, 119.

Of the total deaths from phthisis, 7,127, or 71·1 per cent., were of persons between 15 and 45 years of age.

TABLE X.—Showing, by PROVINCES, the Number of Deaths from Phthisis or Pulmonary Consumption *registered* in Ireland during the Ten Years 1871–80; the Average Annual Number for that period; with the number *registered* in 1881, and the Rate represented thereby.

Mesenteric Disease.—The deaths from Mesenteric disease numbered 1,166—580 males and 586 females.

Gout.—Only 25 deaths from Gout were registered (13 males and 12 females).

Cancer, Malignant Disease—There were 1,909 deaths tabulated under this heading, of which 861 were those of males, and 1,048 of females.

V.—DEVELOPMENTAL DISEASES.

The deaths in this class amount to 16,094 of which 15,725 (6,326 males and 9,399 females) were ascribed to "old age." Of the remaining 369 deaths, 294 are tabulated under the head of "premature birth," 13 were caused by cyanosis, 18 by spina bifida, &c.

VI.—LOCAL DISEASES.

The number of deaths from "local diseases" registered amounted to 37,470 (20,082 males and 17,388 females), or 1 in 2·4 of the deaths from all causes.

Diseases of the Nervous System.—From this group of diseases there resulted 8,503 deaths—4,684 males and 3,819 females. They include 3,244 from convulsions (nearly all children), 1,616 from paralysis, 1,154 from apoplexy, 686 from inflammation of the brain, 370 from epilepsy, 349 from insanity (general paralysis of the insane), 4 (all males) from chorea or St. Vitus's dance, 254 from softening of the brain, &c.

Diseases of the Circulating System.—Diseases of the Circulating System caused 4,724 deaths—2,562 males and 2,162 females.

*Diseases of the Respiratory System.**—The deaths from these diseases, omitting those from croup, which disease was not included in this group in former years, amounted to 16,936 (8,988 males and 7,948 females,) being equal to 300·5 in every 100,000 of the population. The average number for the preceding ten years was 14,299, the annual numbers varying from 11,419 in 1874 to 18,441 in 1879. The respective rates for the

* Exclusive of Phthisis or Pulmonary Consumption, for which see "Constitutional Diseases."

Provinces, in 1881, are Leinster, 374·6 per 100,000 persons; Munster, 311·8; Ulster, 290·1; and Connaught, 188·5.

As many as 11,682 of the deaths from these causes (5,939 males and 5,743 females) resulted from bronchitis; 2,192 (1,380 males and 812 females) were from pneumonia or inflammation of the lungs; 519 from asthma and emphysema; 299 from pleurisy; 89 from laryngitis, &c.

TABLE XI.—Showing, by PROVINCES, the Number of Deaths from Diseases of the Respiratory System* *registered* in Ireland during the Ten Years 1871–80; the Average Annual Number for that period; with the number *registered* in 1881, and the Rate represented thereby.

Diseases of the Digestive System.—These diseases contributed 4,724 deaths (2,570 males and 2,154 females). They include 463 from enteritis or inflammation of the bowels; 314 from peritonitis or inflammation of the covering of the bowels; 404 from ileus or obstruction of the bowels; 230 from ulceration of the intestines; 142 from hernia; 6 (3 males and 3 females) from fistula; 191—134 males and 57 females—from cirrhosis of liver, &c.

Diseases of the Urinary System.—To the various affections of this order of diseases 1,369 deaths (964 males and 405 females) were ascribed. Of these deaths, 482 (280 males and 202 females) were from Bright's disease, 110 from nephritis or inflammation of the kidneys; 32 from ischuria or suppression of urine; 17 from stone in the bladder; 54 from uræmia, &c.

The remaining deaths from Local Diseases comprise 30 from *Diseases of the Lymphatic System and of Ductless Glands*; 663 from Diseases of the *Reproductive System* (including 201 from diseases of the Organs of Generation, and 462 from the Accidents of Childbirth); 216 from *Diseases* of the *Locomotive System*; and 265 from *Diseases of the Integumentary System.*

VII.—VIOLENT DEATHS.

The number of violent deaths registered during the year was 2,152 (1,499 males and 653 females), or 41·6 in every 100,000 of the population, being slightly over the average for the ten years 1871-80. Accidents or negligence caused 1,921 of these deaths (including 744 from fractures and contusions, 449 from burns or scalds, and 416 from drowning); there were 131 cases of homicide (murder and manslaughter), and 100 of suicide.

* Exclusive of Phthisis or Pulmonary Consumption, for which see "Constitutional Diseases," and of Croup, which, previous to the year 1881, was not included in this group of diseases.

TABLE XII.—Showing, by PROVINCES, the Number of Deaths in Ireland caused by Violence (including Accidental, Homicidal, and Suicidal Deaths), *registered* during the Ten Years 1871–80; the Average Annual Number for that period, with the number *registered* in 1881, and the Rate represented thereby.

Inquests.—There were 2,781 inquests reported to the Registrars during the year 1881, being 1 inquest to every 32 deaths registered.

AGES.

Deaths of infants under 1 year old numbered 11,481, being equal to 9·1 per cent. of the number of births registered.

Amongst children under 5 years of age 19,490 deaths occurred—a mortality equal to 33·8 in every 1,000 of the living at that age. Of these 10,516 were boys and 8,974 girls; the former number representing 36·0 in every 1,000 boys, and the latter 31·6 in every 1,000 girls under 5 years old.

The deaths of persons aged 65 years and upwards are equivalent to 9·3 per cent. of the living at that age.

Amongst the deaths registered are 656 of persons stated to have been aged 95 years and upwards—287 males and 369 females.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the year 1881 amounted to 78,417; of these, 40,106 were males and 38,311 females. Of the whole number, 16,232 were from Leinster; 21,752 from Munster; 24,101 from Ulster; and 16,332 from Connaught.

Of the emigrants in 1881, 14·7 per cent. were under 15 years of age; 76·0 per cent. were between 15 and 35 years old; and 9·3 per cent. were 35 or upwards.

PRICES OF PROVISIONS, AND PAUPERISM.

The average prices, in Dublin, of oatmeal, potatoes, and beef in 1881 were under those for the preceding year, potatoes being very much cheaper; the average price of Messrs. Manders and Co.'s 4-lb. loaf (7½*d.*) was equal to the average price in that year. Oatmeal averaged 14*s.* 1*d.* per cwt., being 1*s.* 4*d.* under the mean price for 1880; the average prices of potatoes ranged from 2*s.* 5*d.* to 3*s.* 8*d.* per cwt., against 4*s.* 2*d.* to 7*s.* 4*d.* in 1880; and those of beef from 57*s.* 6*d.* to 68*s.* 6*d.* per cwt., against 64*s.* to 72*s.* 6*d.*

TABLE XIII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during the years 1871–81, and the AVERAGE NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturdays in those years; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during each quarter of the year 1881.

* Compiled from Returns furnished by the Local Government Board.

Surveying the period covered by the several Tables in this Report, *i.e.*, 1881, and the ten years preceding, it is found that beef was lowest in the year 1879, when the average prices ranged from 57*s.* to 68*s.* per cwt.; bread in 1875, 1876, and 1879, in each of which the average price of Messrs. Manders' 4lb. loaf was 7*d.*; oatmeal in 1881, when the average price was 14*s.* 1*d.* per cwt., and potatoes in 1881, when the average range of prices was from 2*s.* 5*d.* to 3*s.* 8*d.* per cwt. The highest average price of bread was 8*d.* in the years 1872–3–4–7; of oatmeal, 18*s.* 8*d.* in 1874; the highest range for potatoes, 4*s.* 6*d.* to 8*s.* per cwt. in 1873, and for beef, 64*s.* to 82*s.* 6*d.* per cwt. also in 1873.

From Returns, for which I am indebted to the Local Government Board, it appears that the average number of workhouse inmates in Ireland on Saturdays during the year 1881 was 53,038, being 1,572 under the average for the preceding year; and that the average number of persons receiving out-door relief was 61,550, or 4,516 over the corresponding number for 1880.

THE WEATHER.

The following particulars have been extracted from Returns of Meteorological Observations taken during the years 1870–81, at 40, Fitzwilliam-square, West, Dublin, by J. W. Moore, M.D., Univ. Dub., F.K.Q.C.P., F.M.S., Observer at Dublin for the Meteorological Office, London.

The mean Atmospherical Pressure has been obtained from daily readings of the barometer at 9 A.M. and 9 P.M., corrected and reduced to 32° Fahrenheit at the mean sea level. The Mean Temperature values have been deduced from the maximal and minimal readings of the thermometer in the shade by Kaemtz's Formula, viz., *min.* $+\{max.-min.\times\cdot41\}=$*Mean Temperature.* The per-centage Amount of Cloud has been deduced from observations made three times daily—at 9 A.M., 3 P.M., and 9 P.M.—for the years 1870–1874 inclusive, and from observations made twice daily—at 9 A.M. and 9 P.M. —for the years 1875–1881 inclusive. The Rainfall is that measured daily at 9 A.M. A *rainy day* is one on which at least one-hundredth (·01) of an inch of rain falls within the twenty-four hours from 9 A.M. to 9 A.M.

The *Mean Height of the Barometer* during the year 1881 was 29·910 inches. The highest observed reading was 30·737 inches, at 9 A.M. on May 10th. The lowest observed reading was 28·377 inches, at 9 A.M., on November 27th. The extreme range of atmospherical pressure was, therefore, 2·360 inches.

The *Mean Temperature* of the year, deduced from the maximal and minimal readings of the thermometer in the shade by Kaemtz's formula, was 47·7°. The highest reading was 76·6° on July 17th; the lowest reading was 15·2° on January 25th. The average mean temperature for the years 1870-80 calculated in the same way, was 48·8°. The mean temperature, deduced from the daily readings of the dry bulb thermometer at 9 A.M. and 9 P.M., was 48·4°.

Rain fell on 198 days, including snow or sleet on 27 days, and hail on 32 days. The average number of rainy days in the years 1870–80 was 197·7. The total rainfall measured 27·033 inches, compared with an average of 29·017 inches in the years 1870-80. Of this amount only 11·660 inches fell in the first six months of the year, on 98 days.

As regards the *Direction of the Wind*, 730 observations were made during the year, with this result—N., 34; N.E., 32; E., 95; S.E., 72; S., 65; S.W., 110; W., 216; N.W., 70; Calms, 36.

The year 1881 was rather colder than usual, with a rainfall somewhat below the average, the rainy days, however, being exactly equal to the mean of the preceding ten years. January was very severe, with much snow and frost. The mean temperature was 32·4°, a lower value than that of any month in the fifteen years ending 1880, with the single exception of December, 1878, the mean temperature of which was 32·0°. February was rather cold and dull; the mean temperature was 2·7° below the average. The earlier part of March was unsettled, with frequent rains and high winds. The weather became fine and seasonable on the 15th and continued so to the close. April was a cold, chiefly dry month; the mean temperature was 2·5° below the average. May was a very fine spring month, notable for clear skies, and bright sunshine, and a moderate rainfall, principally in the form of showers. June was very showery and at times cold—the shade thermometer falling to 36·8° on the 8th, and the mean temperature being 1·3° below the average. July was characterized by almost continuous S.W. and W. winds, which often blew strongly, causing rather changeable weather; the mean temperature was slightly above the average. August opened with a fair promise, which was not fulfilled, for after the first few days, which were fair and warm, the weather became very unsettled with strong winds, frequent rains, and a low temperature—the mean being 3° below the average. September was a cool, generally fine month, the mean temperature slightly below, and the rainfall and rainy days decidedly below the average of previous years. October was rather cold and stormy—the mean temperature 2° under the average—with

a preponderance of easterly winds and a rainfall above the average; a violent storm occurred on the 14th. The weather in November was throughout singularly open, stormy, and unsettled; the air was unusually free from fog. The mean temperature was 2·3° higher than that of October, and 6·5° above that of November 1880. The beginning and the end of December were mild, but a cold period commenced on the 7th, lasting to the 23rd; hence the mean temperature (40·3°) was slightly below the average.

A general review of the year 1881 shows that the annual mean temperature was 1·0° below the average (47·7° compared with 48·7°); the amount of cloud was as nearly as possible the average (61·0 per cent. compared with 60·9 per cent.); the rainfall was somewhat deficient (27·033 inches compared with 29·017 inches), while the rainy days were equal to the average, being 198 compared with 197·7.

TABLE XIV.—Showing the average Monthly MEAN TEMPERATURE, AMOUNT OF CLOUD, RAINFALL in Inches, and Number of RAINY DAYS for the Eleven Years 1870–1880 inclusive; and the Monthly MEAN TEMPERATURE, AMOUNT OF CLOUD, RAINFALL in Inches, and Number of RAINY DAYS for the year 1881.

[For detailed Table for 1881, see page 33.]

NOTE.—This table has been constructed for the years 1801 to 1831—By adopting the rates of increase of the male and female population between 1821 and 1831, as shown by the Irish Census Reports of 1831—the first complete Census of Ireland having been taken in 1821.

1832 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death rates, as above, were used, deducting the number of emigrants according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871 as explained for the last period.

1872–81—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872–81, to allow for the discrepancy between the number thus arrived at for 1881 and the estimate based on the Census taken on the 3rd of April in that year.

ANNUAL ABSTRACTS

OF

MARRIAGES, BIRTHS, AND DEATHS.

1881.

ABSTRACT OF MARRIAGES.—Marriages *registered* in Ireland, pursuant to the

No.	REGISTRATION PROVINCES AND COUNTIES.*	Area in Statute Acres, exclusive of the larger Rivers, Lakes, and Tideways.	Population, 1881.	TOTAL MARRIAGES. NOTE.—The Registrars' Districts are subdivisions of the Unions or Superintendent Registrars' Districts, and are identical with the Dispensary Districts of the same names, except in a few instances.

The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

Wherever the minus sign (—) is prefixed to the numbers given in the column headed "Excess of Births over Deaths," it denotes that the births in the Registrar's District, instead of exceeding the deaths, were, in fact, *less than the deaths*, to the extent stated.

Youghal 63

* Thus, the number of Marriages in the Abbeyleix Superintendent Registrar's District may at once be ascertained by referring in the "*Abstract of Marriages*" to the Superintendent Registrar's District, numbered 27 (*see* page 38), and in like manner the number of Births and Deaths, of Deaths at different ages, &c., will be found by referring to the same Superintendent Registrar's District Number in the appropriate Tables.

INDEX TO REGISTRARS' DISTRICTS.

[The Number against each Registrar's District in the Third Column refers to the page in which the Total Births, Illegitimate Births, Deaths, &c., in the District during the year are given.]
